FOREWORD

The Preliminary 2023 First Semester Official Poverty Statistics presents the official poverty statistics for the first semester of 2023. These estimates are based on the first visit of the 2023 Family Income and Expenditure Survey (FIES) with January to June 2023 as reference period and conducted by the Philippine Statistics Authority (PSA) in July 2023. Additionally, this report includes back estimates for 2018 and 2021 First Semester Official Poverty Statistics.

The 2023 First Semester Official Poverty Statistics provides poverty estimates at the national, regional, provincial, and highly urbanized city levels. These estimates were generated using the methodology for the estimation of the official poverty statistics, which utilizes income data from the FIES. This methodology was approved through PSA Board Resolution No. 1, Series of 2017 – 171 (NSCB Resolution No. 09, Series of 2011).

This publication contains statistical tables presenting key poverty data for the first semesters of 2018, 2021, and 2023. These include food and poverty thresholds, subsistence and poverty incidences among families and the population, and other valuable poverty indicators such as income gap, poverty gap, and severity of poverty.

The PSA extends its sincere gratitude to individuals and organizations involved in the first visit of the 2023 FIES, particularly the thousands of respondents who contributed their time, effort, and valuable information, enabling the survey's successful completion.

The release of the 2023 First Semester Official Poverty Statistics within six months of the reference period signifies a significant advancement in promoting more timely statistics. It is hoped that this report will prove beneficial to the public, particularly researchers, and policy and program makers, in further developing and enhancing poverty reduction strategies.

CLAIRE DENNIS S. MAPA, PhD
Undersecretary
National Statistician and Civil Registrar General

Highlights of the 2023 First Semester Official Poverty Statistics

A. National

1. Incidences and Magnitude

Based on the preliminary results of the Family Income and Expenditure Survey (FIES) Visit 1 conducted in July 2023, poverty incidence among families or the proportion of Filipino families with incomes that are not sufficient to buy their minimum basic food and non-food needs or the poverty incidence among families in the first semester of 2023 was estimated at 16.4 percent. Among individuals, the poverty incidence was estimated at 22.4 percent or 25.24 million poor Filipinos in the first semester of 2023.

Meanwhile, subsistence incidence or the proportion of Filipino families whose incomes are not sufficient to meet the basic food needs in the first semester of 2023 stood at about 6 for every 100 families. Among individuals, about 9 in 100 Filipinos lived below the food thresholds in the first semester of 2023.

Table 1. Food and Poverty Thresholds, Incidences and Magnitude of Poor and Food Poor: First Semester 2018, 2021 and 2023

Statistics	First Semester Estimate			Coefficient of Variation		
	2018	2021	2023	2018	2021	2023
Monthly Poverty Threshold for a Family of Five (PhP)	10,532	12,082	13,797			
Poverty Incidence or Proportion of Poor (%)						
Among Families ^{1/,2/}	16.2	18.0	16.4	1.1	1.2	2.2
Among Population ^{1/,2/}	21.1	23.7	22.4	1.1	1.1	1.9
Magnitude of Poor (in million)						
Among Families ^{1/}	4.04	4.74	4.51	1.2	1.3	2.8
Among Population ^{1/}	22.26	26.14	25.24	1.2	1.3	2.5
Monthly Food Threshold for a Family of Five (PhP)	7,374	8,393	9,550			
Subsistence Incidence or Proportion of Food Poor (%)						
Among Families ^{1/,2/}	6.2	7.1	5.9	1.8	1.8	4.7
Among Population ^{1/,2/}	8.5	9.9	8.7	1.7	1.8	4.0

CSM

Statistics	First Semester Estimate			Coefficient of Variation		
	2018	2021	2023	2018	2021	2023
Magnitude of Food Poor (in million)						
Among Families ^{1/,2/}	1.55	1.87	1.62	1.8	1.9	5.3
Among Population ^{1/,2/}	9.03	10.94	9.79	1.8	1.9	4.6

Source: Philippine Statistics Authority

Notes: 1/ Based on t-test at 95% level of significance, the observed change from 2018 to 2021 is significant.

2/ Based on t-test at 95% level of significance, the observed change from 2021 to 2023 is significant.

2. Thresholds and Income

On the average, a family with five members will need at least PhP13,797 per month to meet their minimum basic food and non-food needs in the first semester of 2023. This amount, which is also referred to as the poverty threshold, was higher by 14.2 percent from the estimated PhP 12,082 monthly poverty threshold for a family of five in the first semester of 2021. On the other hand, to meet their minimum basic food needs in the first semester of 2023, a family with five members will need at least PhP 9,550 per month. This was higher than the food threshold in the first semester of 2021, which is estimated at PhP8,393.

It is to be noted that income collected in the FIES refers to various sources, such as wages and salaries, entrepreneurial activities and other sources of income. The other sources of income, include net share, cash receipts from abroad and from domestic source, rentals received, interest, pension, dividends, net receipts, those received as gifts (in cash or in kind), and imputed rent.

In the first semester of 2023, the average per capita income increased by 12.8 percent from 2021 to 2023, faster than the growth from the first semester of 2018 to 2021 of 4.5 percent. It may also be noted that the mean per capita income of families in the first and second income decile class increased by 21.4 and 19.4 percent, respectively. These families are the ones near the poverty threshold. Hence, despite the 14.1 percent increase in the prices as reflected in the poverty threshold, a 1.6 percent reduction in the poverty incidence was observed.

Table 2. Per Capita Poverty Threshold and Mean Per Capita Income: First Semester 2018, 2021 and 2023

Indicators	First Semester Estimate			Increase/Decrease (%)	
	2018	2021	2023	2018-2021	2021-2023
Poverty Incidence (%)	16.2	18.0	16.4	1.8	-1.6
First Semester Per Capita Poverty Threshold (PhP)	12,638	14,498	16,557	14.7	14.2
Mean Per Capita Income (PhP)	34,093	35,628	40,202	4.5	12.8

Indicators	First Semester Estimate			Increase/Decrease (%)	
	2018	2021	2023	2018-2021	2021-2023
First Decile	7,604	8,318	10,098	9.4	21.4
Second Decile	12,048	13,224	15,783	9.8	19.4
Third Decile	15,416	17,022	20,141	10.4	18.3
Fourth Decile	19,014	20,945	24,686	10.2	17.9
Fifth Decile	23,176	25,378	29,792	9.5	17.4
Sixth Decile	28,262	30,897	36,095	9.3	16.8
Seventh Decile	35,143	38,168	44,471	8.6	16.5
Eight Decile	45,737	48,973	56,565	7.1	15.5
Ninth Decile	64,562	68,257	78,020	5.7	14.3
Tenth Decile	150,418	151,488	168,716	0.7	11.4

3. Other Poverty Measures

Other poverty measures being generated by PSA include the income gap, poverty gap, and severity of poverty (squared poverty gap).

The income gap measures the average amount of income required by the poor in order to get out of poverty, expressed in relation to the poverty thresholds. The income gap was estimated at 25.6 percent in the first semester of 2023, which means that on the average, a poor family with five members need an additional monthly income of about PhP 3,535 to move out of poverty in the first semester of 2023. This can serve as a useful reference especially in determining the necessary budget that can be transferred/added to the income of the poor and lift them out of poverty.

Table 3. Income Gap, Poverty Gap and Severity of Poverty: First Semester 2018, 2021 and 2023

Statistics	First Semester Estimate			Increase/Decrease	
	2018	2021	2023	2018 - 2021	2021 - 2023
Income Gap ^{2/}	27.0	27.0	25.6	0.1	(1.4)
Poverty Gap ^{1/,2/}	4.4	4.9	4.2	0.5	(0.6)
Severity of Poverty ^{1/,2/} (Squared Poverty Gap)	1.8	2.0	1.6	0.2	(0.3)

Source: Philippine Statistics Authority

Notes: 1/ Based on t-test at 95% level of significance, the observed change from 2018 to 2021 is significant.

2/ Based on t-test at 95% level of significance, the observed change from 2021 to 2023 is significant.

COFm

B. Regional

At the regional level, the regions with the lowest poverty incidence among families in the first semester of 2023 were NCR, CAR, and CALABARZON. On the other hand, BARMM consistently registered the highest poverty incidence among families at 34.8 percent in the first semester of 2023. Moreover, more than half of the regions posted significant changes in their incidences from 2021 to 2023. The regions with significant decreases were: NCR, CAR, Regions II, III, XII, Caraga, and BARMM. On the other hand, a significant increase was observed in Region XI from 14.0 percent in first semester of 2021 to 20.3 percent in first semester of 2023.

Table 4. Per Capita Poverty Thresholds and Poverty Incidence among Families, by Region: First Semester 2018, 2021 and 2023

Region	First Semester Per Capita Poverty Threshold (in Php)			First Semester Poverty Incidence among Families					
				Estimates (%)			Coefficient of Variation

Notes: 1/ Based on t-test at 95% level of significance, the observed change from 2018 to 2021 is significant.

2/ Based on t-test at 95% level of significance, the observed change from 2021 to 2023 is significant.

3/ Still includes the 63 barangays from Cotabato, which are now part of BARMM.

4/ Still excludes the 63 barangays from Cotabato, which are now part of BARMM.

COF

C. Provincial

At the provincial level, the provinces which consistently belonged to the group with the least poverty incidence among families in the first semester of 2018, 2021 and 2023 were NCR, Benguet, Cavite, Ilocos Norte, Laguna, Pampanga, Rizal, and Siquijor. On the other hand, the provinces of Batanes and Batangas were included in the least poor cluster since the first semester of 2021. Meanwhile, the other provinces that joined this roster of least poor cluster in the first semester of 2023 are: Aklan, Apayao, Bataan, Cagayan, Camiguin, Guimaras, Ifugao, Kalinga, and Nueva Vizcaya.

Table 5. Provinces in Least Poor Cluster Based on the 2023 Poverty Incidence Among Families: First Semester 2018, 2021, and 2023

Source: Philippine Statistics Authority

Notes: 1. Provinces were clustered using 90% confidence intervals of poverty incidence among families.

2. Five clusters were established with the poverty incidence in the First Semester of 2018 as the reference range in each cluster. Cluster 5 refers to the least poor provinces.

CSM

On the other hand, Basilan has been consistently included in the cluster with relatively high poverty incidence among families 2018, 2021 and 2023. Tawi-tawi is in the poorest cluster in the first semester of 2023.

Table 6. Provinces in Poorest Cluster Based on the Poverty Incidence Among Families: First Semester 2018, 2021 and 2023

Province	2018				2021				2023			
	Cluster	Poverty Incidence	90% Confidence Interval		Cluster	Poverty Incidence	90% Confidence Interval		Cluster	Poverty Incidence	90% Confidence Interval	
			Lower Limit	Upper Limit			Lower Limit	Upper Limit			Lower Limit	Upper Limit

Notes: 1. Provinces were clustered using 90% confidence intervals of poverty incidence among families.

2. Five clusters were established with the poverty incidence in the First Semester of 2018 as the reference range in each cluster. Cluster 1 refers to provinces with relatively high poverty incidence among families.

COFm

D. Highly Urbanized Cities

In general, poverty incidence in highly urbanized cities (HUCs) are relatively lower compared to many of the provinces in the country. In HUCs within NCR, the following cities registered significant decline in their poverty incidence among families from the first semester of 2021 to 2023: Cities of Caloocan, Navotas, Las Piñas, Muntinlupa, Parañaque, Pasay and Taguig. On the other hand, for HUCs outside NCR, the City of Butuan registered the highest significant decrease from 26.5 percent in the first semester of 2021 to 16.9 percent in 2023 while the City of Bacolod is the only HUC that significantly increased.

Table 7. Poverty Incidence among Families, in Highly Urbanized Cities (HUCs): First Semester 2018, 2021 and 2023

Highly Urbanized City	First Semester Poverty Incidence Among Families (%)		
	2018	2021	2023
City of Manila ^{1/}	5.7	2.0	3.7
City of Mandaluyong	1.4	1.2	0.6
City of Marikina	4.1	3.4	2.3

Notes: a/ Pateros is the only municipality in NCR.

1/ Based on t-test at 95% level of significance, the observed change from 2018 to 2021 is significant.

2/ Based on t-test at 95% level of significance, the observed change from 2021 to 2023 is significant.

Notes:

1/ significant change; The increase or decrease in the poverty incidence among families between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the poverty incidence among families between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 poverty incidence among families is greater than 20%.

b/ Coefficient of variation of 2021 poverty incidence among families is greater than 20%.

c/ Coefficient of variation of 2023 poverty incidence among families is greater than 20%.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:
1/ significant change; The increase or decrease in the poverty incidence among families between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).
2/ significant change; The increase or decrease in the poverty incidence among families between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).
3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabatoand Cotabato City, which are now part of BARMM.
4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.
a/ Coefficient of variation of 2018 poverty incidence among families is greater than 20%.
b/ Coefficient of variation of 2021 poverty incidence among families is greater than 20%.
c/ Coefficient of variation of 2023 poverty incidence among families is greater than 20%.
d/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.
p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

1/ significant change; The increase or decrease in the poverty incidence among population between 2018 and 2021 is significant at 5% level of significance (α = 0.05).

2/ significant change; The increase or decrease in the poverty incidence among population between 2021 and 2023 is significant at 5% level of significance (α = 0.05).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 poverty incidence among population is greater than 20%.

b/ Coefficient of variation of 2021 poverty incidence among population is greater than 20%.

c/ Coefficient of variation of 2023 poverty incidence among population is greater than 20%.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

1/ significant change; The increase or decrease in the poverty incidence among population between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).2/ significant change; The increase or decrease in the poverty incidence among population between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 poverty incidence among population is greater than 20%.

b/ Coefficient of variation of 2021 poverty incidence among population is greater than 20%.

c/ Coefficient of variation of 2023 poverty incidence among population is greater than 20%.

d/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

1/ significant change; The increase or decrease in the subsistence incidence among families between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the subsistence incidence among families between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 subsistence incidence among families is greater than 20%.

b/ Coefficient of variation of 2021 subsistence incidence among families is greater than 20%.

c/ Coefficient of variation of 2023 subsistence incidence among families is greater than 20%.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

^{1/} Significant change; The increase or decrease in the subsistence incidence among families between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).^{2/} Significant change; The increase or decrease in the subsistence incidence among families between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).^{3/} The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.^{4/} The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 subsistence incidence among families is greater than 20%.

b/ Coefficient of variation of 2021 subsistence incidence among families is greater than 20%.

c/ Coefficient of variation of 2023 subsistence incidence among families is greater than 20%.

d/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

1/ significant change; The increase or decrease in the subsistence incidence among population between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the subsistence incidence among population between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 subsistence incidence among population is greater than 20%.

b/ Coefficient of variation of 2021 subsistence incidence among population is greater than 20%.

c/ Coefficient of variation of 2023 subsistence incidence among population is greater than 20%.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

1/ significant change; The increase or decrease in the subsistence incidence among population between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the subsistence incidence among population between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 subsistence incidence among population is greater than 20%.

b/ Coefficient of variation of 2021 subsistence incidence among population is greater than 20%.

c/ Coefficient of variation of 2023 subsistence incidence among population is greater than 20%.

d/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

* Details may not add up to total due to rounding off

1/ significant change; The increase or decrease in the magnitude of poor families between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the magnitude of poor families between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 magnitude of poor families is greater than 20%.

b/ Coefficient of variation of 2021 magnitude of poor families is greater than 20%.

c/ Coefficient of variation of 2023 magnitude of poor families is greater than 20%.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

* Details may not add up to total due to rounding off

1/ Significant change; The increase or decrease in the magnitude of poor families between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).2/ Significant change; The increase or decrease in the magnitude of poor families between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 magnitude of poor families is greater than 20%.

b/ Coefficient of variation of 2021 magnitude of poor families is greater than 20%.

c/ Coefficient of variation of 2023 magnitude of poor families is greater than 20%.

d/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

* Details may not add up to total due to rounding off

1/ significant change; The increase or decrease in the magnitude of poor population between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the magnitude of poor population between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 magnitude of poor population is greater than 20%.

b/ Coefficient of variation of 2021 magnitude of poor population is greater than 20%.

c/ Coefficient of variation of 2023 magnitude of poor population is greater than 20%.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:
* Details may not add up to total due to rounding off
1/ significant change; The increase or decrease in the magnitude of poor population between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).
2/ significant change; The increase or decrease in the magnitude of poor population between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).
3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.
4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.
a/ Coefficient of variation of 2018 magnitude of poor population is greater than 20%.
b/ Coefficient of variation of 2021 magnitude of poor population is greater than 20%.
c/ Coefficient of variation of 2023 magnitude of poor population is greater than 20%.
d/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.
p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

* Details may not add up to total due to rounding off

1/ significant change; The increase or decrease in the magnitude of subsistence poor families between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the magnitude of subsistence poor families between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 magnitude of subsistence poor families is greater than 20%.

b/ Coefficient of variation of 2021 magnitude of subsistence poor families is greater than 20%.

c/ Coefficient of variation of 2023 magnitude of subsistence poor families is greater than 20%.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

* Details may not add up to total due to rounding off

1/ significant change; The increase or decrease in the magnitude of subsistence poor families between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the magnitude of subsistence poor families between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 magnitude of subsistence poor families is greater than 20%.

b/ Coefficient of variation of 2021 magnitude of subsistence poor families is greater than 20%.

c/ Coefficient of variation of 2023 magnitude of subsistence poor families is greater than 20%.

d/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

* Details may not add up to total due to rounding off

1/ significant change; The increase or decrease in the magnitude of subsistence poor population between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the magnitude of subsistence poor population between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 magnitude of subsistence poor population is greater than 20%.

b/ Coefficient of variation of 2021 magnitude of subsistence poor population is greater than 20%.

c/ Coefficient of variation of 2023 magnitude of subsistence poor population is greater than 20%.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

* Details may not add up to total due to rounding off

1/ significant change; The increase or decrease in the magnitude of subsistence poor population between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the magnitude of subsistence poor population between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Coefficient of variation of 2018 magnitude of subsistence poor population is greater than 20%.

b/ Coefficient of variation of 2021 magnitude of subsistence poor population is greater than 20%.

c/ Coefficient of variation of 2023 magnitude of subsistence poor population is greater than 20%.

d/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

1/ significant change; The increase or decrease in the income gap between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the income gap between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Note:
1/ The increase or decrease in the income gap between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).
2/ The increase or decrease in the income gap between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).
a/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.
p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

1/ significant change; The increase or decrease in the poverty gap between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the poverty gap between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Note:

1/ The increase or decrease in the poverty gap between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ The increase or decrease in the poverty gap between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.

p- This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

1/ significant change; The increase or decrease in the severity of poverty between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the severity of poverty between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Note:

1/ The increase or decrease in the severity of poverty between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ The increase or decrease in the severity of poverty between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

3/ The 2018 and 2021 estimates still includes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM.

4/ The 2018 and 2021 estimates still excludes the 63 barangays from North Cotabato and Cotabato City, which are now part of BARMM in 2023.

a/ Caution in utilizing the estimate for the city must be observed due to its very small sample size.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

1/ significant change; The increase or decrease in the poverty incidence among families between 2018 and 2021 is significant at 5% level of significance ($\alpha = 0.05$).

2/ significant change; The increase or decrease in the poverty incidence among families between 2021 and 2023 is significant at 5% level of significance ($\alpha = 0.05$).

a/ Coefficient of variation of 2018 poverty incidence among families is greater than 20%.

b/ Coefficient of variation of 2021 poverty incidence among families is greater than 20%.

c/ Coefficient of variation of 2023 poverty incidence among families is greater than 20%.

d/ Variable used in the cluster analysis is the 90% confidence interval of poverty incidence among families.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Notes:

a/ NCR is grouped into the four districts: 1st District: City of Manila; 2nd District: City of Mandaluyong, City of Marikina, City of Pasig, Quezon City and City of San Juan; 3rd District: City of Caloocan, City of Malabon, City of Navotas and City of Valenzuela; and 4th District: City of Las Pinas, City of Makati City, City of Muntinlupa, City of Parañaque City, Pasay City, Pateros and City of Taguig.

p - This is based on the preliminary results of the First Visit of the 2023 Family Income and Expenditure Survey (FIES).

Glossary of Terms

Food threshold - the minimum income required for a family/individual to meet the basic food needs, which satisfies the nutritional requirements for economically necessary and socially desirable physical activities

Income Gap - the average income shortfall (expressed in proportion to the poverty threshold) of families/individuals with income below the poverty threshold divided by the total number of poor families/individuals

Note: The difference between the income gap and the poverty gap is the use of number of poor families/ individuals as denominator for the income gap. For the poverty gap, the total number of families/individuals is used.

Poverty gap - the total income shortfall (expressed in proportion to the poverty threshold) of families/ individuals with income below the poverty threshold divided by the total number of families/ individuals

Poverty incidence - the proportion of families/individuals with per capita income less than the per capita poverty threshold to the total number of families/individuals

Poverty threshold - the minimum income required for a family/individual to meet the basic food and non-food requirements

Note: Basic food requirements are currently based on 100% adequacy for the Recommended Energy and Nutrient Intake (RENI) for protein and energy equivalent to an average of 2000 kilocalories per capita, and 80% adequacy for other nutrients. On the other hand, basic non-food requirements, indirectly estimated by obtaining the ratio of food to total basic expenditures from a reference group of families, cover expenditures on: 1) clothing and footwear; 2) housing; 3) fuel, light, water; 4) maintenance and minor repairs; 5) rental of occupied dwelling units; 6) medical care; 7) education; 8) transportation and communication; 9) non-durable furnishings; 10) household operations; and 11) personal care & effects.

Severity of poverty - the total of the squared income shortfall (expressed in proportion to the poverty threshold) of families/ individuals with income below the poverty threshold divided by the total number of families/ individuals

Note: This is equal to the Foster-Greer-Thorbecke (FGT) family of measures with $\alpha = 2$. It is a poverty measure, which is sensitive to the income distribution among the poor – the worse this distribution is, the more severe poverty is.

Subsistence incidence - the proportion of families/individuals with per capita income less than the per capita food threshold to the total number of families/ individuals

TECHNICAL NOTES ON THE 2023 FIRST SEMESTER OFFICIAL POVERTY ESTIMATION METHODOLOGY

I. INTRODUCTION

The first official methodology for the poverty assessment in the Philippines was adopted in 1987. Three major refinements in the official methodology for measuring poverty have been made in 1992, 2003/2005/2006 and 2011.

One major feature of the first refinement in 1992 was the exclusion of alcohol, tobacco, recreation, durable furniture, and equipment as well as other miscellaneous expenditures in the list of basic non-food requirements considered in the determination of the poverty line/threshold. Poverty line/threshold refers to the minimum income/expenditure required to meet the basic food and non-food requirements.

In 2003, another improvement was introduced in recognition of the need for poverty estimates with lower levels of disaggregation, specifically at the provincial level. Using the same regional food bundles in the 1987 and 1992 methodologies developed by the Food and Nutrition Research Institute (FNRI), provincial food thresholds were generated using actual provincial prices collected by then National Statistics Office, which is now part of the Philippine Statistics Authority (PSA).

The latest refinements in the official poverty estimation methodology were approved in 2011 through PSA Board Resolution No. 1, Series of 2017-171, *Approving the Refinements in the Official Poverty Estimation Methodology*, to address some issues/concerns raised on the estimation of food and poverty thresholds, incidence and other measures of poverty, the relevance of official poverty statistics and the comparability of poverty estimates across space and over time. The refinements were based on the recommendations of the Technical Committee on Poverty Statistics (TC PovStat), who are designated to develop/formulate the official poverty estimation methodology. To address the comparability across space and over time, a national reference food bundle was developed as basis for provincial food bundles. The provincial food bundles that were adopted were subjected to the Test of Revealed Preferences, such that the food bundle of a province will have the cheapest cost in comparison with using the bundles of other provinces. In addition, a constant food expenditure to total basic expenditure (FE/TBE) ratio is to be used for ten years. The PSA Board Resolution included a provision that the methodology shall be reviewed every ten (10) years to ensure relevance and accuracy. This methodology has been used since its approval in 2011. As of 2023, the methodology is currently being reviewed by the TC PovStat.

In addition to the generation of full year official poverty statistics, PSA started the release of first semester official poverty statistics in 2013 based on NSCB Board Resolution No. 8, Series of 2013 Approving the Official Methodology for the Estimation of First Semester Official Poverty Statistics. The official poverty estimation methodology for full year poverty statistics was adopted with January to June as the reference period, which is covered by the first visit of the Family Income and Expenditure Survey (FIES).

II. COMPILATION METHODOLOGY

A. Unit of Measure

1. Food threshold – in current pesos (usually, per capita or per person in the first semester)
2. Subsistence incidence – in percent for the reference semester
3. Poverty threshold – in current pesos (usually, per capita or per person in the first semester)
4. Poverty incidence – in percent for the reference semester

B. Coverage

1. Food threshold – national, regional, provincial (with urban-rural areas), and highly urbanized city (HUC) level
2. Subsistence incidence – national, regional, provincial, HUC
3. Poverty threshold – national, regional, and provincial (with urban-rural areas) and HUC
4. Poverty incidence - national, regional, provincial, HUC
5. Other measures of poverty (poverty gap, income gap, severity of poverty) - national, regional, provincial, HUC

C. Estimation and Compilation Methodology

1. *Estimation of Food Threshold*

- a) The use of a national reference food bundle as starting point – to enhance comparability across space.
- b) The national reference food bundle was converted to province-specific food bundles, which were used to estimate the provincial food thresholds. These provincial food bundles were formulated by nutritionists from the Food and Nutrition Research Institute and were subjected to the Test of Revealed Preferences such that the food bundle of a province will have the cheapest cost in comparison with the bundles of other provinces. The provincial food bundles have the following characteristics:
 - Nutritionally adequate, i.e., it satisfies the 100% Recommended Energy and Nutrient Intake (RENI) for energy and protein and 80% RENI for other vitamins and minerals;
 - Food items in the food bundle are locally available and eaten in the area (in the province);
 - Least cost in the province; and
 - Visualizable (i.e., can be cooked together and fit for human consumption).
- c) Sources of data:
 - Provincial food bundles developed by FNRI
 - Retail price surveys for the actual prices of agricultural and non-agricultural commodities, by province from PSA
 - Proportion of food bought and own-produced components from the Food Consumption Survey, FNRI

d) General Procedures:

- Each of the ingredients in the food bundle is priced using the available price data (average price for January to June)
- The urban and rural food thresholds for each of the provinces, which have bought and own-produced components, are computed.
- The provincial urban/rural annual per capita food threshold/line is computed as:

$$FT = (\text{cost per capita of the one-day food bundle}) \times (30.4 \text{ days/month}) \times 6 \text{ months}$$

2. Estimation of Subsistence Incidence

- Given the provincial urban-rural food threshold, the subsistence incidence is computed as:

$$S = \left(\frac{F}{n} \right) * 100$$

where:

F = weighted total number of families (individuals) with semestral per capita income less than the provincial urban-rural semestral per capita food threshold/line

n = weighted total number of families (individuals) in the province

3. Estimation of Poverty Thresholds

- a) As common practice in most countries, the non-food component is measured indirectly due to the difficulty of determining the required bundle for the non-food items.
 - b) To ensure comparability across space and over time, the ratio of food expenditures (FE) to total basic expenditures (TBE) of a reference family (families whose per capita income is around the food threshold) is held constant for a certain period. The average of the nationally determined FE/TBE ratio from the FIES in 2000, 2003, 2006 and 2009, which is equivalent to 0.6983, has been used since 2009 and still being used until 2023.
- c) Sources of data:
- The 2023 Family Income and Expenditure Survey Visit 1 was conducted in July 2023 with the reference period of January to June 2023. The total completed samples was 171,588 families spread across 118 sampling domains around the country. This large sample size can provide reliable estimates at the national, regional, provincial and highly urbanized city levels.

d) General Procedures:

- The urban/rural provincial poverty threshold is computed by dividing the food threshold with the FE/TBE ratio.

$$\text{Poverty Threshold} = \frac{\text{Food Threshold}}{\frac{FE}{TBE}}$$

where:

$$\frac{FE}{TBE} = 0.6983$$

FE = actual food expenditure of families within the +/- ten percentile band of the subsistence incidence among families

TBE = total basic expenditure of families within the +/- ten percentile band of the subsistence incidence among families.

TBE is an aggregate of expenditures on

- food
- clothing and footwear
- fuel; light and water
- housing maintenance and other minor repairs
- rental of occupied dwelling units
- medical care
- education
- transportation and communication
- non-durable furnishing
- household operations; and
- personal care and effects

4. Estimation of Poverty Incidence

- Given the provincial urban-rural poverty threshold, the poverty incidence is computed as:

$$P = \frac{Q}{n} * 100$$

where:

Q = weighted total number of families (individuals) with semestral per capita income less than the semestral per capita poverty threshold/line

n = weighted total number of families (individuals)

5. Estimation of other measures of poverty such as Income Gap (I), Poverty Gap (PG) and Severity of Poverty (SP)

Income Gap

- the weighted average income shortfall (expressed in proportion to the poverty threshold) of families/individuals with income below the provincial urban-rural poverty threshold.

$$Income\ gap = \frac{1}{q} \sum_{i=1}^q \frac{Z - X_i}{Z}$$

where:

Z = provincial urban-rural per capita poverty threshold/line

X_i = per capita income of the i^{th} family

q = number of families below the poverty threshold

Poverty Gap

- the weighted total income shortfall (expressed in proportion to the poverty threshold) of families/ individuals with income below the poverty threshold divided by the weighted total number of families/ individuals

$$Poverty\ gap = \frac{1}{n} \sum_{i=1}^q \frac{Z - X_i}{Z}$$

where:

Z = provincial urban-rural per capita poverty threshold/line

X_i = per capita income of the i^{th} family

q = number of families below the poverty threshold

n = total number of families

Note: The difference between the income gap and the poverty gap is on the denominator. For the income gap, the denominator is the number of poor families/individuals. For the poverty gap, the total number of families/individuals is used.

Severity Gap

- the weighted total of the squared income shortfall (expressed in proportion to the poverty threshold) of families/individuals with income below the poverty threshold, divided by the weighted total number of families/individuals

$$Severity\ gap = \frac{1}{n} \sum_{i=1}^q \left(\frac{Z - X_i}{Z} \right)^2$$

where:

Z = per capita poverty threshold/line

X_i = per capita income of the i th family

q = weighted total number of families below the poverty threshold

n = weighted total number of families

Measures of Precision

- a. The official poverty statistics shall be released with measures of precision such as standard errors, confidence intervals and coefficients of variation.
- b. Ranking of provinces shall not be released due to overlapping confidence intervals. Clustering of provinces based on the poverty incidence among families shall be released instead.
